

単位になれよう。

長さ

$1km = 1000m$ です。まずはこれを覚えましょう！
下に 5 回、 $1km = 1000m$ と、声に出しながら書きましょう。

にあてはまる数字を書きましょう。

(1) $1000m = \square \quad km$

(2) $2000m = \square \quad km$

(3) $9000m = \square \quad km$

(4) $4000m = \square \quad km$

(5) $7000m = \square \quad km$

(6) $11000m = \square \quad km$

(7) $10000m = \square \quad km$

(8) $42000m = \square \quad km$

(9) $21000m = \square \quad km$

(10) $54000m = \square \quad km$

(11) $19000m = \square \quad km$

(12) $41000m = \square \quad km$

(13) $71000m = \square \quad km$

(14) $99000m = \square \quad km$

(15) $1000m = \square \quad km$

(16) $100000m = \square \quad km$

(17) $66000m = \square \quad km$

(18) $49000m = \square \quad km$

(19) $21000m = \square \quad km$

(20) $8000m = \square \quad km$

(21) $4000m = \square \quad km$

(1)1(2)2(3)9(4)4(5)7(6)11(7)10(8)42(9)21(10)54
